TestFlight Tester Guide - Build 5 - Tiha Geez

Thank you for testing! This guide lists everything we have fixed and added so far, how to try each area, and the easiest ways to report anything that feels off. You do not need to test in order - just use the app naturally and flag what stands out.

New in Build 5

7. Lines read 3 times (e.g. Sibhat le'Ab in ZeZewetir) now highlight three times in sync, a dim "3x" badge marks them, and the "(3 times)" note is no longer highlighted as a word.
8. Fixed a chapter that skipped ~10 seconds of real singing (Psalm 57 - weyewesk...), so the highlight now stays with the voice.

How a 3x line looks in the reader

PLAYBACK & AUDIO

1 Background & lock-screen playback + auto-advance

- Keeps playing when you leave the app or lock the screen.
- Auto-advances to the next track (try Wudase Mariam / Zerebue).
- Continues across a section boundary (e.g. psalm 20 into 21) when you keep playing.

2 Auto-resume after interruptions

- Playback resumes on its own after a phone call ends.
- Resumes after an alarm is dismissed.

3 Playback speed stays put

- Set the speed once (e.g. 1.5x) - it stays across tracks until you change it.

4 Player controls respond immediately

- Fixed a case where the Play button felt unresponsive on first tap.

STUDY & PRACTICE

5 Study mode 2x / 3x phrase repeat

- Repeats each phrase the correct number of times (it used to skip ahead or stall).
- Correctly repeats phrases read in more than one part (a segment with a pause).

READING & HIGHLIGHTING

6 Word highlight follows the audio accurately

- Fixed places where the highlight stuck or lagged behind the voice.
- Fixed a phrase whose last word never highlighted (Abune Zebesemayat).
- Re-fit the per-word timing in many chapters (Birhan, Beselus and others).

7 Lines read several times (2x / 3x)

NEW in Build 5

- A line sung 3x now sweeps the highlight three times, in step with each repeat.
- The "(ሠላስተ ጊዜ)" = "(3 times)" instruction is hidden from the words and never highlighted.
- A dim "3x" badge marks these phrases (see the example near the top).

8 No more skipped singing (silence fix)

NEW in Build 5

- A chapter was jumping past ~10s of real reading; the highlight now stays with the audio (Psalm 57).

9 Clearer emphasis & pinch-to-zoom

- The active word and its group read more clearly.
- Pinch the reading text with two fingers to size it up or down; the size sticks.

NAVIGATION

10 Section dropdown matches the tab you are in

- In Mezmure Dawit the dropdown follows the tab: reading section, by day, or full psalm.

11 Swipe between tracks and sections

- Swiping past a section's last track continues into the next section.

CONTENT CORRECTIONS

12 Reading (nibab) tone marks & word fixes

- Corrected tone marks and fixed missing / wrong words across many chapters - Yiwedsawa (Maryam, Leki), the Prophets' prayers (Nebiyat), Mehalye Selomon, and others.

TELLING US WHAT IS WRONG

13 Report Issue - built for quick, mostly-tap feedback

- Open it from the player ? menu. Pick a type, then mostly tap.
- For a tone error: pick the word, then pick the correct tone.
- Or flag a sync / audio / text problem in a couple of taps.

Report Issue (player ? menu) - pick a type, mostly taps

የንባብ ስሕተት	wrong reading / tone -> pick the word, then the correct tone
የድምፅ-ጽሑፍ አለመመጣጠን	audio & text out of sync
የድምፅ ችግር	audio problem / wrong recording
የጽሑፍ ስሕተት	misspelled or missing word
ሌላ	anything else

Easiest ways to test

Just use it the way you naturally would, then flag anything that feels off.

Play a few tracks back-to-back; lock the screen and switch apps - does audio keep going and advance?

Turn on study mode 2x / 3x and watch a phrase repeat.

Watch the highlighted word against the voice - check the 3x lines in ZeZewetir (Sibhat, Kidusna Esegd).

Pinch to zoom the text. Download a chapter in Settings > Manage Downloads and play with Wi-Fi off.

Native readers: please flag any wrong tone, misspelled/missing word, or audio that does not match the text.

Easiest ways to report

In-app (best): player ? menu > Report Issue. Mostly taps; it already knows which psalm/track you are on.

Screenshot: in TestFlight take a screenshot, then tap the notification to attach it with a note.

Always say which psalm / track, and what you expected vs what happened.

Prefer email? info@tihageez.com or ermiasnow@gmail.com.

Note: audio streams from eathebook.org (with permission) - playback needs internet unless downloaded; text and lessons work offline.
